

## Day2- Assignment Questions with Solutions for Class

### Form Creation Task:

**1. Create an HTML form for a student registration system. The form should include:**

- Name (Text field)
- Email (Email field)
- Password (Password field)
- Gender (Radio buttons)
- Course Selection (Dropdown with options like HTML, CSS, JavaScript)
- Skills (Checkboxes for options like Frontend, Backend, Database)
- A Submit button

**Save the form in an HTML file and ensure all fields are properly labeled.**

### **2. Styling with Inline CSS:**

**Design a simple feedback form with fields for "Name," "Email," and "Comments" (Text Area).**

- **Apply inline CSS to style the form:**
  - Set text color to blue.
  - Increase the font size of labels to 16px.
  - Center align the submit button.
- **Provide the HTML code with inline CSS in your submission.**
