

Day2-Exercise Questions

HTML Forms

1. **Create a Simple Contact Form** Create a contact form that asks for the user's name, email, and message. Add a submit button to send the data.
 2. **Design a Login Form** Create a login form with fields for username and password and include a reset button.
 3. **Create a Feedback Form** Build a feedback form with checkboxes for rating a product (1–5 stars) and a text area for additional comments.
-

Colors and Fonts

4. **Apply Colors** Create a paragraph with text styled in red using both inline CSS and color names.
 5. **Font Styling** Create a paragraph styled with the font family Arial, font size 18px, and bold font weight.
