

Day1-CSS-Exercise Questions:

1. Inline, Internal, and External CSS

- Create a simple webpage where:
 - One paragraph is styled using **inline CSS**.
 - Another paragraph is styled using **internal CSS**.
 - A third paragraph is styled using **external CSS**.
- Compare the advantages and disadvantages of each approach.

2. CSS Box Model

- Given the following CSS:
 - `div {`
 - `width: 300px;`
 - `height: 200px;`
 - `padding: 20px;`
 - `border: 5px solid black;`
 - `margin: 10px;`
 - `}`
- Calculate the **total width and height** of the `<div>` element and explain how the box model works.

3. Color Formats in CSS

- Write CSS code to apply the same **red color** to text using:
 - **Color name**
 - **Hexadecimal code**
 - **RGB format**
