

## In-Class Assignment Questions: Dictionaries

### Question 1: Creating and Accessing Dictionaries

1. Create a dictionary called person with the following details:
    - Name: "John"
    - Age: 30
    - City: "New York"
  2. Perform the following:
    - Print the value of the "Name" key.
    - Add a new key-value pair "Country": "USA".
    - Update the "Age" key to 31.
    - Print the updated dictionary.
- 

### Question 2: Dictionary Methods

Given the dictionary:

```
fruits = {"apple": 50, "banana": 20, "cherry": 30, "date": 40}
```

Perform the following:

1. Print all the keys in the dictionary.
  2. Print all the values in the dictionary.
  3. Print all the key-value pairs using the items() method.
  4. Add a new fruit "mango" with a price of 60.
  5. Remove the fruit "banana" from the dictionary.
