

Day1- Exercise Homework Questions

1. Create a Simple HTML Page

- Create an HTML document that includes the following:
 - A heading (<h1>) that says "My First HTML Page."
 - A paragraph (<p>) introducing yourself.
 - Add a horizontal line (<hr>) below the paragraph.

2. Build a Basic Table

- Create a table to display a class schedule:
 - Include columns for Day, Subject, and Time.
 - Add at least three rows of data.
 - Use the border attribute to add a border to the table.

4. Add an Image

- Insert an image using the tag.
 - Use an online image or one stored locally.

5. Create Lists

- Build an HTML page containing:
 - An unordered list of your favorite foods.
 - An ordered list of your top three goals.
 - A definition list explaining three technologies (HTML, CSS, JavaScript).
-
