Day1-CSS-Assignment Questions:

1. **CSS Styling and Layout**

   o Create an HTML page with a **separate external CSS file** to apply styles. The page should include:

   - A **header, a main content area, and a footer**.

   - Proper use of **margins, padding, and borders**.

   - A **background image** for the header and a solid color background for the footer.

   o Ensure the page is visually appealing using proper color combinations.

2. **Selectors and Specificity**

   o Write an HTML page with at least **three different sections**. Use:

   - **Element selectors** to style all <p> tags.

   - **Class selectors** to style specific sections.

   - **ID selectors** to highlight an important part of the page.

   o Explain the **order of priority** in which styles are applied if an element has multiple selectors.

3. **Positioning and Display Properties**

   o Design a **navigation bar** using CSS with:

   - A **fixed position** at the top of the page.

   - Menu items that are **inline-block** and evenly spaced.

   - A hover effect that changes the background color of the menu items.

   o Add content to test how the fixed navbar behaves when scrolling.
